Vision (Small Project)

1. Introduction

1.1 Purpose

The purpose of this document is to collect, analyze, and define high-level needs and features of the Music Mobile App. It focuses on the capabilities needed by the stakeholders and the target users, and why these needs exist. The details of how the Music Mobile App fulfills these needs are detailed in the use-case and supplementary specifications.

The introduction of the Vision document provides an overview of the entire document. It includes the purpose and references of this Vision document.

1.2 Scope

This Vision Document applies to the Intro to Software Engineering course registration system, which will be developed by the Group 11. The It department will develop this client-server system to interface with the existing course catalog database.

The Music Mobile App will enable user to listen music online and offline.

The Music Mobile App allows artists to upload their song and allow other user to listen it.

1.3 References

PA's document, slides of teacher, PA's video.

2. Positioning

2.1 Problem Statement

The problem of	Our team decided to develop a music mobile app. The software like zingmp3 or spotify allows people to listen to amazing songs and download them. Artists, musicians and singers can upload their music product to servers that allow everyone to listen.
affects	Artists, Listeners
the impact of which is	- User's listening experience - Popularity of the song
a successful solution would be	- Musicians can post music - Users can listen to music - Vip users can download music and listen offline

Music mobile app	Version: <1.1>
Vision (Small Project)	Date: <25/11/2022>
<document identifier>	

2.2 Product Position Statement

For	Music listeners, Musicians
Who	Listen to music, Compose music
The (product name)	It is a Mobile Music player
That	<ul style="list-style-type: none"> - Listen to music online - Download music to listen offline - Upload own song
Unlike	Music apps contain lots of ads Music apps don't allow emerging musicians to post music
Our product	Connect ALL music listeners with ALL musicians under the management of administrator

3. Stakeholder and User Descriptions

3.1 Stakeholder Summary

Name	Description	Responsibilities
Teacher	- Nguyễn Minh Huy	Mentor
Personal Assistant	- Nguyễn Lê Hoàng Dũng - Hồ Tuấn Thanh	Supporter for development team
Development team	Group 11's member	Project responsibility. Project progress tracking
User try	Order group's members	Ensures that the system will meet the needs of user

3.2 User Summary

Name	Description	Stakeholder
Music listeners	People who want to listen to music online	Self-represented
Vip User	People who want to listen to music online and download song for offline	Self-represented
Musician	Musician who want to upload their song	Self-represented

Music mobile app	Version: <1.1>
Vision (Small Project)	Date: <25/11/2022>
<document identifier>	

Administrator	Song curators and musicians (no nonsense uploading)	Self-represented
---------------	---	------------------

3.3 User Environment

Unique environmental constraints: all user, all platforms with internet

Platforms are in use today : Android

Future platforms : Windows, Mac-OS, Web, IOS

Marketing subsequent releases to all music listeners who want to listen to music, all musicians who want to upload their song

3.4 Summary of Key Stakeholder or User Needs

Need	Priorty	Concerns	Current Solution	Proposed Solutions
Free music listeners	Medium	Music listening experience is interrupted	Too many ads are inserted when changing new songs for free users	Free users won't have to watch or listen to any ads
New musicians	High	Can't bring their song to people	They can't upload their songs when they're not well known	All musicians can upload music to the system as long as it's not spam

3.5 Alternatives and Competition

Other music player app be like ZingMp3, Spotify which had many users before, many songs before

4. Product Overview

4.1 Product Perspective

Server is windows application

Client is Android 9.0 or newer, future : windows, IOS, web, Mac-OS

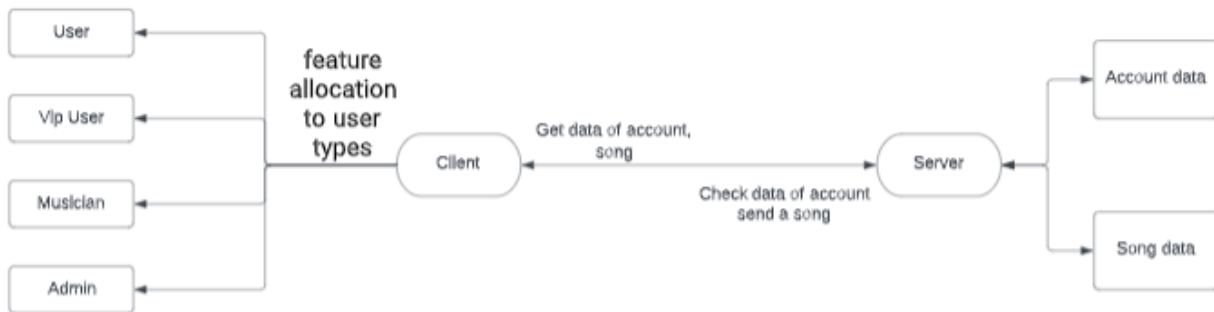

The client will perform the account and password input and transmit the entered information to the server to be checked

The client will allocate rights to use features for certain types of users

When listening to music, the client will ask the server to send information about that song

- Copyrighted music requires a license

Music mobile app	Version: <1.1>
Vision (Small Project)	Date: <25/11/2022>
<document identifier>	

- *The song must be played smoothly without interruption*
- Server system errors must be fixed quickly when the program officially runs
- The application should be able to play one single track at a time.
- The application should be able to automatically pause when there is any incoming call or message.
